PROFESSIONAL OVERVIEW

Computer Science graduate, Cum Laude, with experience building web applications using React, Next.js, TypeScript, Node.js, and SQL/NoSQL databases. Completed a software engineering traineeship and developed projects covering authentication, application tracking, booking workflows, and automated deployment.

WORK EXPERIENCE

Junior Software Engineer Trainee | Armada Logics, La Union Philippines **June 2025 - Aug 2025**

- Developed multiple websites during a software engineering bootcamp using PHP, CodeIgniter, jQuery, HTML, and CSS.
- Built responsive layouts and interactive interfaces for desktop and mobile devices.
- Implemented server-side application logic and resolved functionality and layout issues across training projects.

EDUCATION

Bachelor of Science in Computer Science (Cum Laude) | Tarlac State University, Tarlac Philippines Graduated: 2026

PROJECTS

ApplyFlow | React, Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Drizzle ORM

- Built a responsive, full-stack job application tracker with status dashboards, interview scheduling, and deadline management.
- Implemented Google OAuth and email confirmation through Supabase Auth, with authenticated access to account-specific applications and calendar events.
- Developed month and agenda calendar views and CSV/iCalendar exports, using Drizzle ORM and Supabase PostgreSQL for data persistence.

Alpine Haven | React, Next.js, JavaScript, Tailwind CSS, Supabase, NextAuth.js

- Built a responsive, full-stack booking platform with cabin filtering, date selection, and reservation management.
- Implemented Google OAuth authentication, session management, and authorization for guest accounts and reservations.
- Used React Server Components, server actions, and Supabase PostgreSQL for server-side rendering and data management.

SubTrack | React, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB, Docker, GitHub Actions, Cloudflare

- Built React dashboards and Express APIs for subscription management and spending analytics, with automated renewal emails using Upstash Workflows and Nodemailer.
- Implemented Google OAuth 2.0, JWT authentication, OTP verification, and password recovery, with Arcjet protection and endpoint rate limiting.
- Configured Ubuntu hosting with MongoDB in Docker and Cloudflare Tunnel as a systemd service, plus GitHub Actions for CI/CD.

SKILLS

Languages: TypeScript, JavaScript, PHP, Python, Dart, C#, HTML, CSS
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Flutter, CodeIgniter, Tailwind CSS
Databases & Platforms: MongoDB, MySQL, PostgreSQL, MariaDB, Supabase, Appwrite
Tools: Git, GitHub Actions, Docker, Cloudflare, Vercel, Codex
